Partner

Supported by

TCF 2010 is held as part of InnovFest. Organised by NUS Enterprise, InnovFest is a series of technology-related activities that brings together entrepreneurs, innovators, financiers, industry experts, government agencies, and anyone interested in riding the next wave of technology innovations in the new economy. InnovFest also includes the Enterprise Connection, a networking dinner on 7 March 2010.

Sponsorship Kit

Technology Commercialisation Forum (TCF), 5-6 March 2010 The Enterprise Connection (TEC), 7 March 2010

Conference Objective

Emerging technologies and start-ups represent the next big wave of technology innovation that will reshape the post-crisis economic landscape. Universities are a hotbed for new inventions and technologies and investors, entrepreneurs, multi-nationals and policy makers alike are racing to capitalise on these innovations that will fuel economic growth. For instance, in the US alone, close to \$50 billion was spent in research with \$3.4 billion in industry research performed at US institutions in 2007. 555 startups were formed while more than 680 products were introduced into the market that year.*

TCF2010 will also feature the most comprehensive innovation showcase of emerging technologies from Asia and beyond, hence presenting unlimited investment and partnership opportunities.

And recognizing that funding is a critical in successfully bringing a technology to market, TCF2010 will bring together various government agencies with grants and incentives for research & development and technology commercialisation, aimed at attracting investors and companies alike.

**source: AUTM Licensing Survey 2007*

Features

- Over 20 speakers from more than 10 countries addressing key issues on technology transfer and research commercialisation.
- Networking opportunities with over 300 top minds from academia, research, venture capital, industry and governments from around the world.
- Dynamic sessions covering a comprehensive range of topics from tech transfer best practices to investing in academic research.
- Technology showcases in Cleantech, IDM/ICT and Biomedical Sciences. Showcase your technologies to more than 200 companies, multinationals and investors from around Asia and beyond!
- Access to various government grants and incentives for research & development and technology commercialization.
- Open Innovation: Where multinational corporations are seeking to identify solutions with companies or individuals that meet their technology needs.

Technology Showcase

A perennial crowd favourite, TCF's annual showcase of emerging technologies is set to get bigger and better in 2010! The TCF Technology Showcase is an effective platform for emerging technologies from universities and research institutions to seek potential investors or partners to launch cutting edge innovations into the marketplace.

TCF2010 is ideal for

- **Investors** looking for promising startups or technologies to invest in.
- **Startups / inventors** seeking investors who will believe and invest in their companies/technologies.
- **Companies** searching for new market opportunities by leveraging on technology to grow their business.
- **Multinationals** becoming a corporate VC or enter into a partnership with research labs or universities.
- **Government** directing the strategic areas of R&D to drive knowledge creation and economic growth.
- **Research Institutions** looking for collaboration with top institutions and universities for high impact research.

Technology Commercialisation Forum (TCF), 5-6 March 2010 The Enterprise Connection (TEC), 7 March 2010

2008 Conference Highlights

The 2008 Technology Commercialisation Forum saw a record 300 over participants. The Guest-Of-Honour was *Dr Tony Tan*, Chairman of the [National Research Foundation](#) and Deputy Chairman of the [Research, Innovation and Enterprise Council](#). Dr Tan launched the [Research to Market Platform](#) – an NUS initiative to provide the research community, businesses, academic and research institutions and government agencies with networking and partnering opportunities to innovate and bring technologies from lab to market.

TCF08 also saw two significant MOU signings. NUS and the 5 polytechnics (*Nanyang Polytechnic, Ngee Ann Polytechnic, Republic Polytechnic, Singapore Polytechnic, Temasek Polytechnic*) signed a [Master Research Agreement](#) with the intent to bring technologies closer to commercialisation by leveraging on each other's competencies. The polytechnics are able to tap onto a translational R&D grant initiated by NRF which is created to encourage polytechnics to build on technologies from the universities and public research institutes, and bring these closer to commercialization. In the past, NUS and the polytechnics have worked together in a number of successful partnerships that have brought critical capabilities and technologies into the industry.

NUS also signed a [Memorandum Of Understanding](#) with [Tritech International Holdings Pte Ltd](#) to explore research collaboration in the areas of engineering, environment, water and material science. The parties also agreed to cooperate in promoting the commercialisation of technologies in those areas.

2008 Statistics

Delegates from 109 organizations in 13 countries such as Singapore, Denmark, Germany, Japan, US, Taiwan, India, Australia, Thailand, Brunei, Malaysia, Korea and Nigeria attended the 2-day event.
